

Inseego Appoints Dan Picker as Chief Technology Officer

September 17, 2019

— *Wireless industry veteran brings strategic insights to drive product innovation* —

SAN DIEGO--(BUSINESS WIRE)--Sep. 17, 2019-- Inseego Corp. (Nasdaq: INSG), a 5G and intelligent IoT device-to-cloud solutions pioneer, today announced the appointment of Dr. Dan Picker (Ph.D.) as Chief Technology Officer for Mobile & IoT Solutions.

"We are excited to welcome Dan to our leadership team as we continue to bring 5G innovation to the market," said Dan Mondor, Chairman and CEO for Inseego. "Dan is known for his deep background in wireless technologies and has always worked on the leading edge to drive product innovation. His wireless domain expertise, strategic thinking and leadership skills will be extremely valuable as we continue to develop groundbreaking mobile and fixed wireless broadband solutions for global markets."

Dr. Picker brings more than 30 years of experience in wireless infrastructure, software, medical devices, application design and mobile devices, including 12 years at Nokia, where he was Head of Wireless Platforms, CDMA Operations, with global responsibility for CDMA platform software, hardware and ASIC development. As CTO of PureWave Networks he helped pioneer the world's first high-performance 4G small cell base stations for both terrestrial and aeronautical applications. He also served for two years as the Chair of the International Wireless Industry Consortium (IWPC) Small Cell Working Group, a team comprised of over 120 of the world's top operators and OEMs.

He holds Ph.D. and M.S. degrees in Electrical Engineering (Communication Theory and Systems) from the University of California San Diego, and a B.S. degree in Electrical Engineering from UC Santa Barbara. He also holds over 20 wireless technology patents and publications.

"Inseego has a long history of wireless innovation, and I can't wait to help write the next chapter with a new generation of 5G mobile and IoT products," said Picker. "I am extremely excited about tomorrow's wireless technologies, while also taking a pragmatic approach to helping our customers address today's opportunities. By connecting what's happening in the market to what's happening in the engineering lab, we can deliver on the promise of 5G with new transformative solutions for enterprise and consumer markets."
