

Inseego MiFi® 7000 Global Hotspot Now Available at U.S. Cellular

September 10, 2018

Inseego's enterprise-grade LTE mobile hotspot delivers industry best mobile connection speed, quality and security for large enterprise and small-medium sized businesses

SAN DIEGO--(BUSINESS WIRE)--Sep. 10, 2018-- [Inseego Corp.](#) (Nasdaq: INSG), an industry pioneer in 5G and intelligent IoT device-to-cloud solutions for enterprises, announced today that the premium MiFi 7000 global mobile hotspot is available at U.S. Cellular (NYSE: USM) in the United States.

"Fortune 500 enterprises, government entities, small- to medium-sized businesses and consumers all benefit from the MiFi 7000's superior speed, cellular and Wi-Fi connection quality combined with the industry's most advanced anti-hacking security and encryption capabilities," said Inseego's EVP, IoT & Mobile Solutions, Ashish Sharma. "Working conveniences like QuickCharge and 24 hour battery life also help reinforce and equip an increasingly mobile and connected workforce. From a business perspective, working with U.S. Cellular is another step in our drive to deliver on our strategy to expand our portfolio, customer base and market share around the globe."

For complete details on U.S. Cellular pricing and availability, visit uscellular.com.

Designed to meet rigorous customers' demands, the MiFi 7000 high-performance mobile hotspot features Cat 9 LTE technology, real simultaneous dual-band Wi-Fi for superior performance and additional premium features such as a color touchscreen. The MiFi 7000 meets the most stringent corporate IT security requirements and enables remote team collaboration. In addition, the MiFi 7000 is invaluable for the "road-warrior" by providing a universal charging port to recharge other wireless devices while on the go:

- QuickCharge® technology and MiFi Share, a file-sharing feature accessed via a USB thumb drive. With a powerful battery supporting up to 24 hours of use on a single charge, the MiFi 7000 securely connects up to 15 devices on advanced LTE networks, as well as fall-back to HSPA+/UMTS and GPRS/EDGE networks.
- Advanced security, including hacker prevention, encryption and VPN pass-through, deliver enterprise-grade protection. MiFi 7000 features the latest Wi-Fi security protocols, password protection and Guest Wi-Fi network. IT administrators can customize the settings on the Admin portal to prevent the device's factory reset button from being used.

"The addition of the Inseego MiFi 7000 mobile hotspot to our mobile broadband solutions provides our customers with an easy-to-use, high-performance device to help ensure they can stay connected to our award-winning network at home, work or on-the-go," said Mark Vitale, senior director of product management and device strategy at U.S. Cellular.
