"We're thrilled that our first-to-market 5G mobile broadband solution is receiving global recognition, not only from Mobile Breakthrough, but also from our global 5G customer base, which now includes service providers in nine countries, and many more in active trials," said Wendy Caceres, Inseego CMO. "They're using our 5G M1000 to power a wide variety of use cases in cloud gaming, 4K/8K streaming, live events, AR, VR, telemedicine and other low-latency, data-hungry applications. As the world's first commercial 5G mobile hotspot, the MiFi M1000 is not only a breakthrough product for Inseego, but also for 5G developers, consumers and business users worldwide."

"As the era of 5G has arrived for businesses and consumers, mobile broadband hotspots are in the forefront to seamlessly transition to these next

generation networks," stated James Johnson, managing director, Mobile Breakthrough. "We are thrilled to recognize Inseego in our annual awards program and we congratulate them on their significant achievements this year in delivering on the promise of groundbreaking new wireless technology and solutions."

Connect at 5G speeds with the MiFi M1000 mobile hotspot

The MiFi M1000 provides the speed and throughput needed for a world of new data-intensive applications, from next-gen mobile offices and industrial IoT to immersive entertainment.

For businesses:

- **Mobile workforce:** Connect mobile and remote teams easily, with up to 15 simultaneous Wi-Fi connections to 5G. The new MiFi M1000 provides seamless 5G and 4G LTE connectivity for the best possible combination of speed and coverage.
- **Enterprise-grade security:** Multiple layers of encryption for anti-hacking, customizable user security settings, advanced IT administrative capabilities, VPN pass-through and guest network.

For consumers:

- **Ultra-low latency** provides an immersive, near real-time user experience for Virtual Reality (VR), Augmented Reality (AR) and gaming.
- **Gigabit-per-second capability** means ultra-fast downloading of full-length HD movies and seamless streaming of high-resolution (4K/8K) videos.
