

Vodafone Qatar selects Inseego 5G Indoor CPE FX2000 for GigaHome and enterprise customers

December 13, 2021

Inseego Wavemaker™ 5G indoor router FX2000 delivers fast, secure internet access for home entertainment and business locations

DOHA, Qatar & SAN DIEGO--(BUSINESS WIRE)--Dec. 13, 2021-- [Vodafone Qatar](#) and Inseego (Nasdaq: INSG) are bringing lightning-fast internet access to home and business customers with the launch of the new 5G indoor router FX2000. Combining 5G performance with dual-band Wi-Fi 6 in a compact design, the FX2000 can connect up to 30 Wi-Fi devices, including laptops, tablets, POS systems, smartphones, televisions, smart home systems and gaming consoles.

The Inseego Wavemaker™ 5G indoor router FX2000 is now available at Vodafone Qatar retail locations and [online](#). Bundled with Vodafone's 5G GigaHome Plans, the FX2000 will deliver speed, simplicity and security to users, all in a small and sleek design that fits both business and home spaces.

"Our GigaHome and business customers trust us to provide fast, reliable, secure internet access for a wide range of demanding applications," said Diego Camberos, Chief Operating Officer, Vodafone Qatar. "The Inseego FX2000 router lets them enjoy the full power of 5G performance, whether they're working from home, running a business, streaming movies, using AR/VR headsets, or gaming. We're very pleased to bring this world-class solution to Qatar."

"We're very proud to provide Vodafone Qatar with this powerful 5G fixed wireless access solution for their customers' home

offices, business communications, and immersive multimedia entertainment experiences," said Simon Rayne, Inseego Senior Vice President and Managing Director UK, EMEA, and Asia-Pacific. "Inseego is leading the industry with fixed wireless solutions that can deliver gigabit-plus download speeds, lag-free responsiveness and outstanding reliability."

- **The world's smallest 5G indoor CPE** – With its small footprint and low profile, the FX2000 is currently the smallest indoor customer premises equipment (CPE) on the market. It can be placed on a tabletop or desktop and moved easily when relocating to a new home or office.
- **Easy setup and management** – The FX2000 can be set up by anyone (no service technician needed!) in a few minutes. The Inseego Mobile smartphone app makes it easy to optimize performance and manage the FX2000 with user-friendly control settings.
- **Best-in-class performance** – With Inseego's industry-leading antenna and RF technology, the FX2000 can deliver peak 5G speeds over 1 Gbps* (along with fallback to Cat 22 LTE) for fast and reliable connections with sustained high throughput and low latency for applications such as videoconferencing, streaming media, AR/VR and cloud computing. The FX2000 supports dual-band Wi-Fi 6 for up to 30 connected devices, as well as an ethernet LAN port and USB port, to connect up to 32 devices simultaneously. The ethernet LAN port can also be connected to other routing devices.
- **Enterprise-grade security** – Designed and developed in the U.S. with multiple layers of advanced security, the FX2000 safeguards data with advanced encryption, hacker prevention, password protection, OpenVPN, guest Wi-Fi network and more. Robust authentication protects against cyber threats and allows customers to connect with confidence to their corporate networks.

Work from anywhere – securely

Unlike slow, overcrowded, and unsecured home Wi-Fi networks, the FX2000 provides a fast, separate and secure connection to a corporate network through a carrier-managed 5G network. It provides reliable broadband for employees who don't have dependable internet access at home.

Business-ready

Branch offices, medical offices, retail shops and restaurants all need ultra-reliable connections for their POS systems, business systems, and guest Wi-Fi networks. The FX2000 can be used for both primary internet access and as a backup solution when other internet services go down.

Trusted and secure

Designed and developed in the U.S., Inseego solutions are trusted by leading mobile operators, government agencies and enterprise customers worldwide.
