

Inseego and AT&T Deliver Fixed Wireless Access for Businesses with the Inseego Wavemaker FX4200

January 20, 2026

Key Takeaways:

- Inseego and AT&T Business join forces to deliver a powerful, business-grade fixed wireless connectivity solution that's easy to deploy for businesses of all sizes.
- Inseego's Wavemaker FX4200 device helps bridge the gap between overly complex business wireline solutions and simplistic FWA solutions.
- AT&T Business rounds out its portfolio of 5G-capable FWA devices that, when paired with AT&T Internet Air® for Business services, provides a robust fixed wireless connectivity solution that complements its wireline broadband services.

DALLAS and SAN DIEGO, Jan. 20, 2026 (GLOBE NEWSWIRE) -- Inseego Corp. (Nasdaq: INSG), a global leader in 5G mobile broadband and 5G fixed wireless access (FWA) devices, and AT&T today announced that AT&T Business has selected Inseego's latest 5G FWA device the **Wavemaker™ FX4200** as part of its portfolio of fixed wireless device offerings.

Designed to bridge the gap between performance and ease-of-use for enterprise wireless networks, Inseego's new, innovative approach to FWA provides AT&T Business customers with high-performance 5G connectivity devices, with a focus on simplicity, fast deployment, and easy management options. Starting today, AT&T will make this device available to its business customers.¹

"Our customers are eager for more advanced 5G FWA devices, including business-grade functionality and security. What they want is a simple solution that is easy to deploy, operate, and manage," said Nazanin Hoglund, assistant vice president of mobility devices and converged products, AT&T Business. "We believe the Wavemaker FX4200 will help deliver that."

AT&T delivers powerful business solutions by collaborating with Inseego to provide a fixed wireless connectivity solution with advanced router capabilities, including remote device management, real-time performance insights, and robust security. Businesses can easily manage multiple locations, and the FX4200 is ideal for organizations without on-site IT, such as retail, restaurants, branch offices, pop-ups, schools, and government facilities.

"We're excited to work with AT&T to make fixed wireless access a great solution for businesses at scale," said Juho Sarvikas, CEO of Inseego. "The FX4200 is designed to take the complexity out of enterprise wireless, enabling businesses to use 5G² in a way that feels familiar, reliable, and easy to deploy. We see this as an important step in expanding the role of FWA and cellular connectivity in business networks."

FX4200: Enterprise Power, Simplified

The Inseego Wavemaker FX4200 combines multi-gig 5G performance, where available with built-in intelligence and manageability via Inseego Connect.

Key capabilities include:

- Wi-Fi 7 for up to 256 connections, live failover and failback between wireless and wired WAN options, and reliable service and speed
- 5G-capable, with LTE backward compatibility
- Integrated 8+ hour battery backup for power resilience and ease of deployment
- Enterprise-grade hardware security, including FIPS 140-3 compliance, VPN, and VLAN support
- Zero-touch setup, on-device speed-test, and signal optimization display for faster deployment
- Integrated antennas for simplified deployment, and SMA ports for optional external antennas
- Routing stack with advanced policy control
- All critical IP developed exclusively at Inseego's San Diego headquarters

Availability

The Inseego FX4200 and Inseego Connect are available now through AT&T Business for use with AT&T Internet Air® for Business service (sold separately). For information on AT&T Internet Air® for Business options, see att.com/aiab.
