SaskTel to Offer Global 4G and 4G LTE MiFi 6630 by Novatel Wireless in Saskatchewan Canada

MiFi 6630 offers 4G LTE mobile broadband to SaskTel's 618,000+ subscriber base

Powerful mobile hotspot addresses growing demand for Internet access and wireless connectivity throughout the region

SAN DIEGO and REGINA, Saskatchewan, July 15, 2015 (GLOBE NEWSWIRE) -- [Novatel Wireless, Inc.](http://www.novatelwireless.com), (Nasdaq:MIFI), a leading provider of wireless solutions for the Internet of Things (IoT), today announced that its latest MiFi® brand mobile hotspot, model MiFi 6630, is available beginning today with SaskTel, provider of Saskatchewan, Canada's most advanced 4G LTE wireless network.

The new MiFi 6630, based on the award-winning MiFi 6600 series family, is a powerful mobile hotspot, designed for customers looking for super-fast wireless broadband connectivity.

Global-ready and unlocked for use with international SIMs in over 250 countries, the MiFi 6630 provides average speeds between 5 and 40 Mbps and is powered by QUALCOMM® Chipset MDM9225 (NASDAQ:QCOM), the same chipset used in the Apple iPhone® 6 series, supporting more LTE bands than other mobile hotspots in its class. The MiFi 6630 offers simultaneous connectivity for up to 15 devices, is capable of up to 20 hours of use on a single charge, and uniquely doubles as a charger for devices such as smartphones and tablets without compromising performance.

The MiFi 6630 also comes equipped with advanced enterprise-grade security features including anti-spoofing and filtering controls and supports more than eight LTE bands for connectivity in over 200 countries.

This latest generation MiFi series has already received industry awards and Editors' Choice selections. PC Magazine noted it has "almost everything you could want from a mobile hotspot," while CNET called it "super easy to use" and commended it for best user experience with its "helpful touchscreen interface [and] great feature set."

"We are very excited with the upcoming launch of the MiFi 6630 on the SaskTel network," said John Carney, EVP Sales and Marketing for Novatel Wireless. "The team designed an award-winning platform and the market feedback has been incredible - from excellent quality and reliability ratings to editors' choice awards, the capabilities of the MiFi 6630 make it the ultimate connectivity tool for Canadians on the go or around the globe."

"SaskTel has made significant investments to provide wireless services across Saskatchewan," said Ron Styles, SaskTel President and CEO. "The addition of the MiFi 6630 by Novatel Wireless empowers customers with reliable, high quality, high bandwidth mobile data access."

SaskTel wireless services currently covers 98% of the Saskatchewan population. SaskTel also provides continuous infrastructure investments to enhance their 4G LTE coverage that serves both urban and rural communities.

The new MiFi 6630 will be available at SaskTel stores and authorized dealers, online at www.sasktel.com, or by phone at 1-800-SASKTEL.
