## **Novatel Wireless Awarded CE Certification for First Voice and Data Ovation(TM) 3G Multimedia Application Console**

### **Ovation MCU1200(TM) Certified for Use within Europe and Asia**

SAN DIEGO, Aug 02, 2005 (BUSINESS WIRE) -- Novatel Wireless, Inc. (NASDAQ:NVTL), a leading provider of wireless broadband access solutions, today announced CE certification for the Ovation MCU1200(TM), the first model in the Ovation (TM) Family of 3G Multimedia Application Consoles to offer voice and data capabilities.

Ovation is a portfolio of stand-alone desktop consoles that unifies wireless wide area networking (WWAN), wireless local area networking (WLAN) and circuit switched cellular voice. The Ovation MCU 1200 will provide small office/home office (SOHO), enterprise and residential markets in Europe and Asia with cost-effective access to voice and broadband data services.

The Conversa software suite in the Ovation MCU1200 is designed to support innovative features that provide a rich end-user experience and optimize performance of the console through the following:

- Broadband WWAN Internet Access. Conversa will provide user-friendly and secure wireless broadband access to the Internet, email, corporate networks and virtual private networks (VPNs).

- Advanced Device Networking. Without replacing existing equipment, Conversa will allow SOHO, enterprise and residential users to connect multiple devices, including landline telephones, desktop PCs or laptops, to wireless broadband Internet access, fax machines, printers and other WLAN-enabled peripheral devices from every office or room.

- Analog Voice Calling. Conversa will enable voice calling from landline or cordless telephones using voice over GSM circuit switch, providing an alternative to landline phone service.

- Advanced Security Firewalls. Conversa will enable enterprises to safely share files and securely access email, the Internet and corporate information.

- Location Flexibility. Leveraging Conversa, the Ovation MCU1200 will provide wireless carriers with added flexibility for location deployments and comprehensive management features.

"Receiving CE Certification is great testament to our advanced, state-of-the-art product development as Novatel Wireless rolls out the first model of Ovation consoles that offers voice and data capabilities," said Peter Leparulo, chief executive officer for Novatel Wireless. "Like no other product available today, Ovation provides our worldwide carrier partners with an innovative, converged 3G solution that enables them to compete in the fixed voice and broadband data market."

CE marking enables Novatel Wireless to freely market the Ovation MCU1200 throughout the European market. This indicates that the Ovation MCU1200 conforms to a set of requirements that ensure safety, public health and consumer protection.

### **About Ovation Family of 3G Multimedia Application Consoles Powered**

**by Conversa**

The Ovation Family of 3G Multimedia Application Consoles is a portfolio of stand-alone desktop consoles integrated with GSM, UMTS and 802.11b/g to provide broadband data and voice communications and the delivery of multimedia applications. Ovation is powered by Conversa, a software suite developed by Novatel Wireless that offers broadband WWAN Internet access, advanced WLAN networking, analog voice calling and intelligent routing depending on quality of service and cost, multimedia application support, advanced security firewalls and protocol flexibility.
